

BioBenchGuard report — Selection-leakage reference

genomic prediction (Type E injected)

Per-mechanism status (Type A-G):

Selection leakage (Type E):

three-arm: selector +0.003, pure-leak +0.117, total +0.120 (eps 0.02)

Null validity (Type F):

pooled 0.155 vs within-group -0.041 (gap +0.196; eps 0.03)

Evidence currently supports:

- Type A: present, - Type B: present, - Type C: present, - Type E: present, - Type F: present

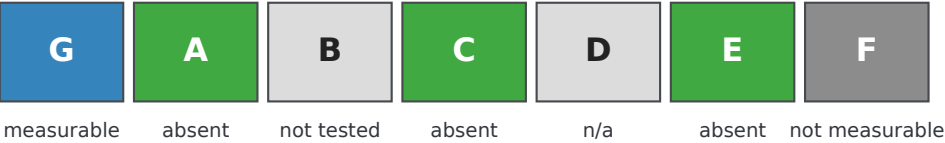

Not measurable (withhold clean verdict):

(none)

BioBenchGuard report — Drug scaffold reference

Bemis-Murcko scaffold (degenerate null)

Per-mechanism status (Type A-G):

Selection leakage (Type E):

three-arm: selector -0.027, pure-leak +0.004, total -0.023 (eps 0.02)

Null validity (Type F):

only 1 group(s) with >= 30 units: within-group metric not reliably measurable

Evidence currently supports:

- Type A: the artefact was measurable and not detected, - Type C: the artefact was measurable and not detected, - Type E: the artefact was measurable and not detected

Not measurable (withhold clean verdict):

Type F
